Request for Certificate of Correction in Patent under 35 USC §254

The enclosed Certificate of Correction (PTO Form 1050) for the above-identified patent is submitted under Rule 322.

The correction requested involves mistakes made by the Patent Office.

The Office has incorrectly listed [75] Inventors: Walter W. Lee, La Mesa, CA (US); Daniel Shoham, San Diego, CA (US); Wesley K. Wilhelm, Spokane, WA (US), Joseph P. Milana, San Diego, CA (US), **Alan P. Jost**, San Diego, CA (US)." Please correct to read as follows: Walter W. Lee, La Mesa, CA (US); Daniel Shoham, San Diego, CA (US); Wesley K. Wilhelm, Spokane, WA (US), Joseph P. Milana, San Diego, CA (US), **Allen P. Jost**, San Diego, CA (US)."

Please see copies of the Filing Receipt and Issue Notification that were both mailed by the Patent Office showing the correct spelling of the fifth inventor, Allen P. Jost. Applicant is unclear how U.S. Patent No. 7,251,624 issued with the incorrect spelling, despite all documents in the file showing the correct spelling of the name of inventor Allen P. Jost.

The patentee is entitled to correction of good-faith transcription of a clerical error where "the correction does not involve such changes in the patent as would constitute new matter or would require reexamination." 35 U.S.C. § 255. Therefore, no new matter is provided with this Certificate of Correction.

The enclosed Certificate of Correction (PTO Form 1050) for the above-identified patent is submitted under Rule 323, in duplicate, with at least one copy being suitable for printing.

Please send the Certificate to the undersigned at the address shown below.

The Commissioner is hereby authorized to charge the fee of \$100 to Deposit Account 07-1445 (Order No. ISAA0043CIP). This paper is provided in duplicate.

Respectfully Submitted,

Michael A. Glenn

(57) **ABSTRACT**

The invention aids an entity to selectively request additional
 data about a user to serve the needs of the entity without
 causing the user to have an adverse reaction. The invention
 helps an entity to determine the condition under which to
 request additional data so as to reduce the likelihood of
 causing the user to have an adverse reaction, e.g., terminate
 the interaction. One embodiment of the invention concerns
 customers requesting transactions with on-line merchants.
 More specifically, this embodiment aids merchants by
 detecting Internet credit card transactions that are likely to
 be fraudulent, and providing the merchants with mecha-
 nisms for managing a suspected transaction as it occurs to
 obtain additional information that can be useful to reducing
 the likelihood of fraud.
